### Automation Status

The examination system is automated. The marks foils, attendance sheets, issue of hall tickets, allocation of registration numbers, grade cards etc. have been computerized. A centrally monitored data base system has been created. The marks per paper of student are entered to computers by two operators separately to ensure correct feeding. Further, examination software generates the results. This has facilitated flexibility and rapidity of action in each sphere of activity in the examination branch. To maintain the uniformity of internal assessment evaluations across the various departments, a software has been provided from the office of the Controller to the departments. The whole examination cell is under CC TV surveillance. The final results of the students at various examinations are communicated to the stakeholders through the publication of the results on the college notice board and college website. A QR code and photograph of the students are added in the grade cards of the students.
